

TimeWise Even Complexion Essence

(TWECE) uses a patent-pending Lucentix complex that restores the clarity of the skin with an overall brightening effect and works to improve uneven complexions by helping to reduce visible dark spots and reverse skin discoloration!

It takes 4-5 weeks before you begin to notice the results of brighter, more even-looking skin and becomes more noticeable

with prolonged use.
It will be most effective when used with a sunscreen and we have the perfect product with our Day Solution with SPF25!

The order of application:

1. cleanse
2. (when using these... use before the
a. Acne products b. Microdermabrasion

"I have to admit I was kind of a skeptic when it 1st came out. I used it on 1/2 of my face for 3 months. I first noticed the difference after 4-5 weeks use and continued to get better until I could look in the mirror and actually see the difference. Even other people would notice. One person said... "It looked like you had a shot of collagen on the affected side. I even noticed the lines smoothing out! I have grown to love it."

Enclosed is a sample that won't deliver results in one try, but you can see how it feels and determine if it is for you to try!
