

Mineral Makeup

Foundation ~ Eye Color ~ Cheek Color ~ Bronzing Powder
Pressed Powder ~ Highlighting Powder

Why Minerals?

Mineral color is a great influence on your skin. Because mineral-based formulas are famous for their oil absorbing properties ease of application, excellent coverage and adhesion to skin. Plus, they prove their loyalty by refusing to give away your age by settling into fine lines and wrinkles. But best of all, these new mineral-based formulas help keep your skin out of trouble with vitamins A, C and E—antioxidants that help protect against wrinkle-causing free radicals.
