

Choose Your Plan

The chart below is designed to show you how much you could expect to earn and the amount of time it might take you to earn it in MK. This chart does not do two things:

1. Take into consideration current clients or compound/add in the expected reorders from previous years' clients. Each year should see an increase in the reorder profit as you build your customer base.
2. Take into consideration income you can earn through sharing the MK opportunity and receiving team-building compensation. This can be a significant source of income.

It is possible to definitely enjoy tremendous profit on part time hours when you work this business correctly by holding skin care classes and providing great customer service. It's up to you to:

1. decide how much time to put in
2. take time to develop the necessary skill sets to achieve the results you desire
3. put yourself in a position to regularly learn from/listen to those who have achieved the success you desire

Classes/Wk with 1-2 <u>new</u> customers at each class	Profit/Week after expenses	Multiplied by 46 weeks a year, giving you 6 weeks off!	# <u>new</u> customers at year end (1 from each class)	Reorder profit: \$75/customer/year based on reorders of \$150 retail per year x # of customers	Total profit for classes/reorders after average expenses	# hrs/week – calculated on 3 hours per class held
