"I was first introduced to Larry's book "The Resilient Power of Purpose" by my Retired Executive National Sales Director Emily McLaughlin, ever since, I've bought several copies and used it for different purposes and it's been a blessing to me and my Future National Area. Larry's book, says it all, "Being "on" in life does not have to be Random occurrence. It can become our predictable, everyday, normal operating procedure. If you keep your inner positive pressure greater than the negative outer pressure, then you will not cave in under the weight of daily life or the doubts that come to steal your dreams. You will be constantly purpose-driven at all times". Honestly Larry, I love your entire message and your materials are so great that I lack words to explain how much of a blessing you have been to me."

THESSY NWACHUKWU - Elite Executive Senior Sales Director
