

## FAIRY GODMOTHER SET

First of all I would like to **thank you** for taking the time to help me with my challenge! I wish I could be there personally to demonstrate our wonderful products with you, but I realize everyone is busy and it's not always possible to meet face to face. Everything you need to create your Fairy Godmother results are in the bag. You can try this at night before you go to bed in the privacy of your own home. You will help me by giving me your honest opinion of the products. As a "thank you" for helping me, I will give you **10%** off the retail price of any product(s) in the bag if you place an order within 1 week of trying the products.

You will use the products on the right side of your face. I want you to be able to feel and see the difference the products make...like a "before-n-after"! You may cleanse both sides of the face, but the remaining products will be used only on the right side. In most cases only a pea sized to dime sized amount of product will be used.

**Step 1: CLEANSE:** Wet your entire face. Using the TimeWise 3-in-1 Cleanser, squeeze a small amount in your hand. Using your fingertips, massage all over the face using upward & outward motions. This will help you defy gravity! Remove the cleanser with a warm damp cloth.

**Step 2: MICRODERMABRASION (2 steps):** a) Refine-wet right side of face. Squeeze small amount in hand and apply with fingertips using upward, outward circular motions. Use a pressure that feels comfortable to you for approx. 1-2 minutes. Avoid the eye area. Rinse thoroughly and dry. b) Replenish-squeeze small amount in hand and apply liberally to right side of face.

**Step 3: MOISTURIZE:** Apply small amount of moisturizer to right side of face.

**Step 4: EXTRA HYDRATION:** Apply Intense Moisturizing Crème or Oil Free Hydrating Gel to right side of face. Use appropriate product for your skin type.

**Step 5: EYE CRÈME:** Open packet of TimeWise Firming Eye Crème and use small amount on right eye only. Gently apply to eye 'well' under the eye and outside corner of eye and upper eye area. You may keep this sample packet for yourself.

**Step 6: TARGETED ACTION LINE REDUCER:** Open packet and apply to deep lines and wrinkles on right side of face. Safe to use around eye area. Full sized product dispenses in a pen and is much easier to 'target'. Try to fill in the lines, pat gently to blend. You may see some white flakes which is an indication that you have used too much. You may keep this sample packet for yourself.

You're done! Now compare the right side of your face to the left side of your face. How does it look & feel? *Don't you think the results are magical?* And that is just after one use! Just think about the difference to your skin after repeated use!

If you want to use the products in the morning again on your entire face, please feel free. However skip the Microdermabrasion step. This is to be used only 2-3 times per week. If you choose to use the products in the morning, you would apply your foundation after step 6.

If you fell in love with any of these products call me at \_\_\_\_\_ to place an order.

*And don't forget to take advantage of **10%** off your order as my special gift to you as my way of saying*

**THANK YOU!**
